

Connecting the financial industry to the opportunities of today and the potential of tomorrow.

Technology is what keeps you ahead of tomorrow. Fueling your organization's ability to grow. Giving you and your customers the power to operate some of the most advanced, high-performance tools available. A network with the access, speed, redundancy, and security that is required to meet the swelling demands in financial technology. With insights from a team of network professionals dedicated to fulfilling the needs of the industry's most sophisticated and demanding customers, including:

- 9 of the top 10 investment banks in the world
- 8 of the top 10 commercial banks in the U.S.
- 4 of the top 5 financial exchanges in the world

We understand that it's not always about how you're connected, but also who you're connected to. Level 3's extensive network footprint can get you to more than two dozen major sources of liquidity and market data, including the top exchanges and ECNs (Electronic Communication Networks).

For financial services companies, Level 3 has the expertise to enable:

- Scalable high-speed connections among headquarters, data centers, and regional locations
- Secure transport and storage of key financial data to comply with SOX, Check 21, and the Patriot Act
- Business continuity and disaster recovery applications
- Virtual private networks for dispersed geographic locations
- Low-latency trading execution and access to market data
- Migration of TDM-based voice infrastructure to IP-based infrastructure
