

Grow your business.
Without the growing pains.

Introducing OneSolutions Complete: a converged-services solution that gives you the flexibility to build your business, without adding a burden to your bottom line.

It's a secure converged-services solution with high-quality voice, Internet, and optional MPLS Virtual Private Networking—delivered via IP over our robust, next-generation network.

By consolidating your services into one seamless solution, you reduce your IT and networking costs. And since pricing is based on bandwidth, you can add lines without adding cost—giving you price protection that's critical in today's economy.

Get a complete solution at a great price.

With OneSolutions Complete, you pay a single, flat monthly fee no matter how you choose to configure it—with no charges for additional lines and no service minimums. Plus, as a managed service, OneSolutions Complete requires no upfront customer-premise equipment cost to you. We own, maintain, and manage the equipment—allowing you to put more capital into growing your business.

OneSolutions Complete features:

- :: Analog, digital, and SIP voice services
- :: Port speeds from 1.5 to 45 Mbps
- :: With SIP, you can get up to 48 concurrent calls per T1, with no extra charge for compression (G.729)
- :: A wide range of bundled features: free Caller ID Name & Number, Call Waiting, Call Forwarding, Direct Inward/Outward Dialing, Hunting, and many more
- :: Local calling options: per-call/per-minute, unlimited local*, or flat local
- :: LD/Toll-Free options: per-minute or Call Packs from 1,000 to 10,000 minutes
- :: Support for various common IP/PBX systems from Avaya® and Cisco®—and with a separate SIP proxy device, Pingtel® and Shortel®
- :: G.711 and G.729 support
- :: Service Level Agreement**

*Some markets are capped at up to 100,000 minutes or 25,000 calls per month. Ask your Sales Representative for details. **For Service Level Agreement details, visit www.onecommunications.com/legal/terms.aspx

Our philosophy is simple.

We think buying the **right telecommunications solution** and putting it to work for your business should be easy—and that you should get the **most value** possible for your investment. That's why we've developed a suite of products that **delivers that value**: everything from basic voice service to managed IP solutions that scale from T1 to DS3. They're the kind of advanced solutions you'd expect from a **premier telecommunications provider**.

- :: Over 1.1 million voice lines

Network Facilities

- :: Facilities-based IP core
- :: 11,000 route miles of fiber
- :: More than 700 collocation sites
- :: Advanced network technologies

The Complete package: Everything you need to keep your business connected.

OneSolutions Complete consolidates your local, long distance, data, and Internet over a single, high-speed connection. It's a secure, seamless managed-services solution powered by Cisco equipment that eliminates upfront costs and reduces your IT and networking costs.

Voice. OneSolutions Complete can handle analog, digital/PRI, and SIP voice handoff. With SIP, you get up to 48 concurrent calls per 1.5 Mbps, with no additional compression charges.

Internet. A robust service that includes features such as hosting, fixed IP address, email, and optional hosted firewall, plus many more.

OneSolutions MPLS Virtual Private Network. If you have multiple locations, you can easily add this optional wide-area networking solution at no additional charge. It seamlessly connects multiple locations over our next-generation backbone—and makes it easy to deploy the latest IP-based, converged services and real-time applications like voice over IP, streaming, e-learning, and video. And with Remote Access, teleworkers can easily connect at home or on the road.

The right solution for your business.

OneSolutions Complete is ideal for businesses that want to:

- :: Relocate, expand, and/or add new locations
- :: Replace outdated PBX or key systems
- :: Integrate multiple network services
- :: Centralize services management to reduce expenses
- :: Consolidate multiple PRI circuits
- :: Use applications that require any-to-any connectivity
