

You can get voice and Internet services from any number of providers.

But you'll get more from One.

The telecommunications industry has become a dizzying array of providers, plans, and pricing. How can you sort it out, make the best choices, and still have time to run your business? Simple. Choose OneSolutions<sup>SM</sup> Enhanced, and leave it to the experts. It combines all the services you need with the features you want, at a fixed, flat-rate price. So you get added value without the added cost.

### Introducing OneSolutions<sup>SM</sup> Enhanced. Everything your business needs to succeed.

We started by examining the specific needs of businesses just like yours. Then, we assembled a single, simple solution to meet them that combines:

- :: Reliable local and long distance phone service
- :: Dedicated, high-speed T1 Internet access—with dynamic bandwidth allocation that helps you maximize your connection at no additional cost
- :: Professional installation, seamless integration, and responsive, comprehensive service whenever you need it

OneSolutions<sup>SM</sup> Enhanced also eliminates the one thing you don't need: the hassle of dealing with multiple providers. We put all the services you need in one, feature-rich package that gives you one-bill convenience—and the ability to easily upgrade your service as your business grows.

Then, we enhanced it, with included extras like email, Web hosting, voice mail, your favorite calling features, and a bandwidth guarantee that comes with our industry-leading Service Level Agreement. No one offers more value for your telecommunications investment.

## Your Business Needs:

## OneSolutions<sup>SM</sup> Enhanced Provides:

One reliable solution for all your communication needs
